

“Cables Only” Marine Warranty Surveyors

Helping to prevent cable failure during installation.

Insurance underwriters, developers and TSOs are insisting on witnessing of cable installation scopes by highly qualified Marine Warranty Surveyors (MWS) to prevent the high claims and incident rates that cost the industry millions.

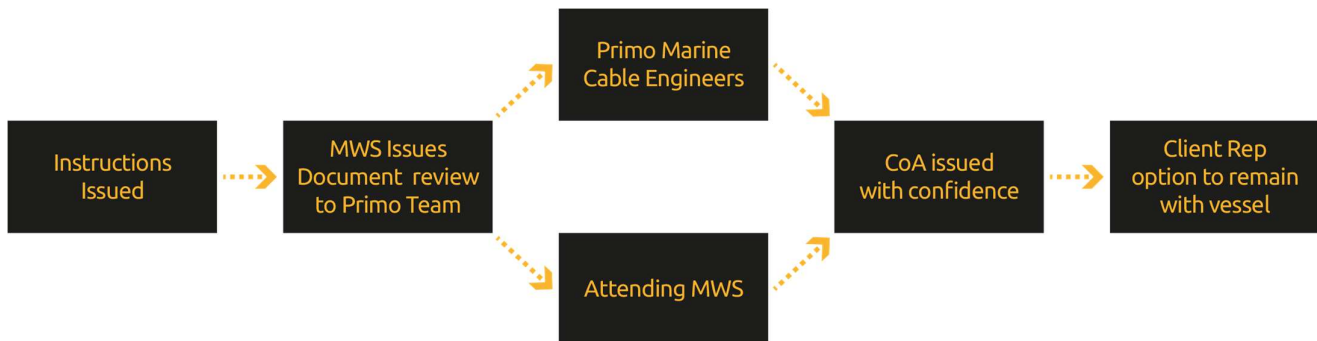

Primo Risk & Control and its team of MWS are now accepting instructions to undertake Marine Warranty services. This is a team who have been dedicated to HV Cable systems from design to installation for over 20 years and supporting over 160 projects. Backed by the submarine cable engineering firm Primo Marine, this will provide insurers, developers and TSOs with the confidence that they correctly represented. The team is experienced in design, manufacturing, loadout, installation, and repairs.

Primo Risk & Control launched this submarine cable specific Marine Warranty service with **Captain Mike Frampton** who brings 20 years of Renewables MWS experience. We have established quality assured methods and surveying practices and protocols to assure our Certificates of Authority (COA). Our MWS Surveyors are members of Society of Marine Warranty Surveyors (**SOMWS**) and abide by their code of ethics. **Primo Marine** and surveyors hold appropriate levels indemnity insurance. We are a **fully independent** company with no ties to Underwriters, Class, Client, or Contractors. Other services include Expert Witness Reports, Root Cause Analysis, Technical Lead, and supply of highly qualified, cable specialist Insurance Representatives.

Primo Risk & Control’s expert staff and marine warranty surveyors will do what they do best - provide focused care of the cable from factory to final installed testing in the field. Our single-minded aim and intention is to reduce both covered and uncovered risks to Insurers, Underwriters, Developers, TSOs and Offshore installation Contractors, on the vessel, in the water column and on the seabed.

If you are self-insured or not the issuance of a COA will ensure that each critical operation to be witnessed is approved and deemed suitable to protect the cable in a safe manner.

Why is this a good match and how does it work?

Primo Risk & Control use their own protocols, procedures, and guidance to ensure that the MWS role is always undertaken to the highest standards ensuring the approval of underwriters, clients, and ourselves.
